

# ALGAE IMPACT [ARTICLE]

The LARB, the Laboratory for Algae Research and Biotechnology, has recently been named one of *Time Magazine's* 50 best inventions. The reason? They hold enormous untapped potential for helping to solve some of humanity's biggest problems. After having seen the video "Algae Impact" you think it would be a good idea to write an article about this research facility. It is meant to be published in the English section of "Der Josephiner Campus", the school's newspaper.

In your **article** you should:

- present the facility and its research programme
- outline advantages of their production method
- explain how humanity can benefit from this research

Write about **250 words**. Give your article a **title**.
